WINNER'S QUOTE:

" *High drop-out rates are a major problem across Europe. We aim to collaborate with people and institutions from all over Europe to empower every European student to excel in their studies with StudySmarter. Thus, I'm especially happy that StudySmarter was chosen as one of the winners to hear the thoughts and ideas from young entrepreneurs to make StudySmarter even better.* "

MENTOR

" *StudySmarter helps students organizing their studies and learning materials. For many students learning is difficult not because of the lack of IQ, but because of sufficient learning strategies. How fast people can take on a new subject does not only depend on the difficulty of the subject by itself but also on HOW new material is being consumed. StudySmarter provides an automated structure for effective and efficient learning. It will revolutionize the art of learning and thus will help to make the world a better place.* "

StudySmarter
Empowering everyone to achieve their educational goals

StudySmarter is a learning platform to empower students to achieve their educational goals. The proprietary technology automatically creates summaries, mind-maps and flashcards from uploaded material, and also recommends suitable additional content within seconds, such as for example a video tutorial or an article.

Gamification features make learning more fun, with statistics and predictive analytics boosting learning transparency. The platform brings together more than 10.000 active users, matching students from across the globe into learning communities.

StudySmarter is a free and scalable solution to solving the dropout crisis in colleges and universities and can become a platform for lifelong learning. With its excellent design, StudySmarter enjoys awesome feedback both from universities and student users who have spent a combined 110.000 hours on the platform, with 78% of them reporting better grades. An intelligent platform advancing the process of studying holistically.
